

**There's just not much to be said here.
Each year the board fills up fast and there are some
who don't get the chance to buy into the game.**

**There are 2 Monday night games in week 1. We will
skip those.**

**The rest of the season has 15 Monday night games and
we will buy squares for \$15 each. This will give
everyone a square worth \$1 for each and every
Monday night game beginning Week 2.**

**If your square hits at the end of each quarter, you will
be credited \$25. (no overtime) A page will be on the
board to show the winners as the season progresses.**

**At the end of the Monday night games, you will have
credit to use for any other contest you want to play.
You may request money due to you at any time.**

**For those who are trying to do the math... I NEVER keep any money up
front. I hand out the money collected to the winners.**
